

RoboKey™

IT AIN'T A RATCHET WRENCH. OKAY?

*It's like a
motorized drum key—but no batteries*

The RoboKey 'GearDrive™' quadruples your wrist turning speed to robotic performance, zipping out those long drum screws and making head changing less of a head 'ache'! *

the GearDrive with one hand and turn with the other. The bolt is zapped-out at 4X speed. That's it! Designed by a drummer FOR drummers, RoboKey has no adaptors to lose and is built for a lifetime of rugged use.

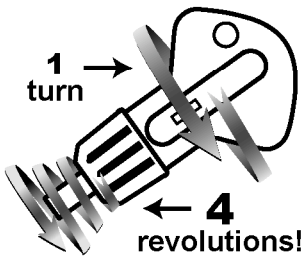

As Rich Redmond of the Jason Aldean band says, ***"It's a total time saver. It reduces wrist tension and it goes everywhere with me."***

Available soon in pro music stores and drum shops everywhere. If you're a drummer, you need RoboKey in your drum arsenal. If you're a retailer, shouldn't you look into this cool tool? Also see RoboKey.com. Now establishing our esteemed dealer network!

It's the only drum tuning and maintenance tool of

its kind. More speedy than a simple T-wrench, crank or ratchet, the patented RoboKey increases every turn of your wrist into FOUR turns of the bolt, taking the frustration out of removing it and making drum head maintenance

easier. It works in both directions. To remove a bolt, loosen it slightly, then hold

LIST \$29⁹⁵

*Intended for use on standard, free winding drum bolts. Not TightScrews™ or similar 'impeded' drum screws.
